📍 Salem

PROFESSIONAL SUMMARY

Passionate Data Science Engineer with strong expertise in Python, Machine Learning, and Deep Learning. Experienced in building real-time AI applications, including computer vision systems and AI-powered financial assistants. Skilled in data preprocessing, EDA, predictive modeling, and delivering actionable insights through hands-on projects, hackathons, and internships.

EDUCATION

B.Tech - Artificial Intelligence and
Data Science

Dhirajlal Gandhi College of Technology

📍 Salem

CGPA (upto 6th Sem)

7.59 / 10

PROJECTS

AI-Powered Financial Assistant

Built an AI agent using Google Gemini LLM and MCP Toolset to provide real-time financial insights, monitor transactions, suggest investments and simulate wealth projections. Integrated structured financial data for personalized recommendations.

Student Malpractice Detection System

Developed an AI-based exam hall monitoring system using YOLOv8, OpenCV, and Flask with real-time dashboard for alerts and statistics.

Real-Time Face and Hand Gesture Detection

Developed a computer vision system using OpenCV and Mediapipe to detect facial expressions (eyes, smile) and hand gestures in real time, providing live feedback on gestures and expressions.

AI-Powered Plant Disease Detection

Built a CNN-based system with transfer learning to identify common plant leaf diseases from images, delivering instant diagnosis and treatment recommendations via a user-friendly interface.

Sentiment Analysis Web App

Built a Flask-based web application combining Naive Bayes and VADER for real-time text sentiment detection, providing Positive, Negative, and Neutral predictions with confidence scores.

LANGUAGES

Tamil English

SKILLS

Programming Languages

Python SQL

AI/Machine Learning

Machine Learning Deep Learning
Natural Language Processing (NLP)
Predictive Modeling AI Agent Builder

Data Science & Analytics

Data Analysis Data Preprocessing
Exploratory Data Analysis(EDA)

Libraries & Framework

NumPy Pandas Matplotlib
Seaborn Scikit-Learn TensorFlow
PyTorch OpenCV Mediapipe

Database & Tools

MySQL Excel

INTERNSHIP

Data Scientist

Stack Queue

📍 Salem

Topic on European Ski Resort DataScientist

- Analyzed trends and patterns in European tourism data to provide actionable insights for optimizing ski resort operations and visitor experiences.

Data Analytics Using Python

Mikrosun Technology

📍 Salem

Topic on COVID 19 Data Analysis Using EDA

- Conducted EDA on state-wise COVID 19 data using Python, leveraging Pandas, Matplotlib, and Seaborn for insights on case trends and recovery rates.

CERTIFICATION

Shortlisted for Google Agentic AI Day 2025 Hackathon

Machine Learning Specialization - LIVEWIRE

Data Science Foundation in Great Learning

2nd place in District level Forest Fire Prevention Hackathon in Salem

Declaration

I hereby declare that the information provided above is true to the best of my knowledge and belief.
